STANDARD IN
SLIP-RESISTANCE**

EXCLUSIVE TO **RSEA**
SAFETY

OUR FOOTWEAR TECHNOLOGY

LEADING SLIP-RESISTANT FOOTWEAR

Since 1984, Shoes for Crews has been helping workers stay on their feet and get home safe.

All Shoes for Crews styles feature a unique grid pattern that displaces oil and liquids for superior slip resistance. The updated range is now available in Australia, exclusive to RSEA Safety.

IT STARTS WITH THE HEEL

The tyres on a race car are super wide, because the more contact they make with the surface, the better the grip. We borrowed that concept for the new heel shape. It's a bit wider and slightly squared off to increase the contact area between the floor and your shoes, to decrease the chance of slip and falls.

ZONE TRACTION

The job you have determines how you move at work and what kind of traction you need. Zone Traction combines the most efficient and powerful traction patterns, and puts them exactly where you need them most to stay safe.

TRIPGUARD

Sometimes big lugs at the front of your shoe can be a trip hazard, so we created TripGuard. Tapered toe to decrease trip hazard when moving between different floor types.

HOVERLITE

We've engineered a foam compound to make many of our styles lighter, making each step easier. Every reduced ounce counts to help take pressure off your legs, knees and joints throughout your work day.

EXTRA-CUSHIONING

Start and stay comfortable. New insole technology and cushion construction that provides greater comfort.

SHIELD OF SAFETY

We don't outsource safety. We own it. That's why we've put our Shield of Safety on our shoes. With one glance, you'll know you're safe.

LEGENDARY SLIP-RESISTANCE TO KEEP YOU SAFE

COMFORT, STYLE AND QUALITY TO KEEP YOU HAPPY

Since 1984, Shoes For Crews has had one of the very best slip-resistant outsoles in the business. We've spent more than 30 years studying the science of safety, and the past two years innovating our entire product collection to bring you upgraded comfort, technology and design to ensure you get home safe.

We hired a team of footwear designers from performance athletic and fashion companies, and moved our production to some of the best factories in the world. You will notice that we have added innovations all over our shoes to make the tops of them work as effectively as the bottoms always have.

Look for extra cushioning for those long shifts and TripGuard to ease your steps from slippery to carpeted surfaces. Flip the shoes over to see the new Zone Traction designed for your work environment.

One thing hasn't changed: our superior slip-resistant outsoles, and that's because we don't outsource safety. We own it. We take it so seriously that we own our own outsole factory so we are in charge of every single ingredient that goes into each outsole and every step in the production process.

Our promise to you is that we will make carefully crafted footwear that also looks fresh and feels great so you can walk into work knowing your shoes are built to withstand demanding conditions. Our mission is to get you home safe, and we walk into work each day knowing you're counting on us.

CLIENT TESTIMONIALS

"The team from Shoes For Crews have been a great help to the company over the last 9 years and provided invaluable support and guidance. The products themselves are worn by all restaurant teams and the effectiveness of the tread has improved the safety and comfort of our teams."
Claire Hussey, Risk Team Manager, KFC Europe

"Our employees have been wearing Shoes For Crews footwear for over 5 years now and remain slip free in the workplace! The anti-fatigue cushioned insoles provide the most comfortable feeling a shoe can have, coupled with the wide variety of styles available ensures that staff are happy, productive and most importantly that they are safe on their feet all day." Burger King Ireland

GET TO KNOW OUR ELEMENTS OF SAFETY

Look for these Elements of Safety to help you find the right shoe for your job, and for you.

COMFORT FIT
Relaxed-fit for a spacious feel.

HOVERLITE
Lightweight foam compound that makes each step lighter.

EXTRA CUSHIONING
New insole technology and cushion construction that provide greater comfort across the collection.

WATER-RESISTANT
Materials treated to repel liquids.

NATURAL FIT
A standard fit for most sizes of feet.

LEATHER UPPER
Natural material encasing the foot above the sole.

COATED LEATHER UPPER
Coated natural material encasing the foot above the sole.

REMOVABLE INSOLE
Insoles are removable to allow custom insoles or orthotics.

TRIPGUARD
Tapered toe decreases trip hazard when moving between different floor types.

ZONE TRACTION
Combination of environment-specific SFC lug patterns for all-new performance outsoles.

PUNCTURE RESISTANT
Puncture-resistant footbed

TAILORED FIT
Slim-fitting design.

CLOG-RESISTANT
Wider spaced traction lugs that limit the amount of debris stuck in outsole.

VEGAN
Does not contain animal product or by-products, no tests on animals.

VENTILATED
Strategically placed mesh panels to help keep feet cool.

STEEL TOE
Steel toe - protection up to 200 joules according to EN ISO 20345:2011.

SPILLGUARD
A protective membrane lining or material overlay that creates a barrier against hot liquids.
